The screenshot displays the Swagger UI for a REST API. The top navigation bar shows the Swagger UI logo and the current URL: `localhost:5038/swagger/index.html`. The main content area is divided into two tabs: 'Parameters' and 'Responses'. The 'Parameters' tab is selected, showing a single parameter named 'id' of type 'integer (int32)' with a required flag and a value of '3'. A 'Cancel' button is visible in the top right corner of the parameters section. Below the parameters, there is an 'Execute' button and a 'Clear' button. The 'Responses' section is partially visible, showing a 200 status code and a JSON response body: `{ "deptCode": 3, "deptName": "REC", "empProfiles": null }`. The 'Request URL' is `http://localhost:5038/api/DeptMasters/3`. The 'Server response' section shows the response headers: `content-type: application/json; charset=utf-8`, `date: Thu, 07 Sep 2023 06:51:50 GMT`, `server: Kestrel`, and `transfer-encoding: chunked`.
